
Denovo Therapy Ketamine Clients:

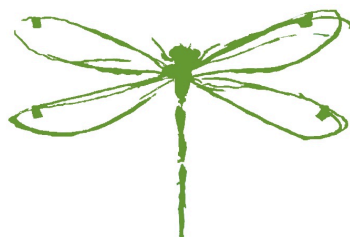

We are passionate about serving our community. That is why despite the pandemic and inflation, we have resisted changing our treatment rates despite the rising cost of medical supplies. For example, according to the American Hospital Association in 2021, healthcare labor increased 19.1%, medications 36.9%, and medical supplies 20.6%.

Looking nationwide, we are proud that our prices are less expensive than other clinics. Around the country, IVs are often priced at \$500-\$700, and Ketamine assisted psychotherapy is \$400-\$1000.

DENOVO Therapy is more than a business to us but in order to remain viable and adapt to the changing market, we are *adjusting our prices across all ketamine treatments by 15% for IVs to \$460, and by %16.7 for KAPs to \$350.*

This change will go into effect on June 15th, 2022.

We are committed to serving our patients. If this change will cause you hardship or prevent you from receiving care, please call us at (806) 808-1198 to discuss options.
